

CANCEL CLAIMS 8 TO 10

11. A method of producing printable signage material for application to a transparent surface, said method comprising:

5 (a) providing a plastic substrate having opposite first and second surfaces, said first surface being light colored and said second surface being dark colored;

(b) applying an ink encapsulating ink receptive coating to said first surface; and

10 (c) perforating said substrate to provide see through visibility when viewed from said second surface.

12. The method of Claim 11 wherein said substrate is selected from the group consisting of polyester, vinyl and polyolefin films.

15 13. The method of Claim 11 wherein said coating is selected from the group consisting of clays, gels, resins and latex combination coatings.

14. The method of Claim 11 including the additional step of applying an adhesive and release liner to said second surface.

*a 1*

15. The method of Claim 11 wherein an image is applied to the first surface by ink jet application.
